## CUSTOM LEGEND

If you are thinking of buying a guitar that will someday be a collector's item, the Custom Legend has all the earmarks with its full rich bass, bright clear sustaining treble, and good solid mid-range which give you the biggest sound you have ever heard.

Today everyone is talking about 50-year old guitars and tops that are thin and flexible. Well for the last six years we have been working on building a guitar that would have the same sounds as a 50-year old guitar, and we did it by developing a new top-bracing design that has never been used before. Together with this, we have pre-selected Sitka spruce tops that have a

specific deflection range.

To match the sound qualities of these instruments, we have added 30 abalone inlays in the fingerboard and bound the complete body with abaloid purfling to give you natural beauty and handcraftsmanship in each and every Custom Legend.

**OVATION® INSTRUMENTS INC.**

NEW HARTFORD, CONNECTICUT 06057
