

# Ultra<sup>®</sup> Hard Bodies

Ovation<sup>®</sup>

# Ultra<sup>®</sup> Hard Bodies...

The hot new Ultra Series Hard Body guitars from Ovation. They've got all the muscle you'll need tomorrow, at a price that you can afford today. Classic body stylings, with the improvements that our professional endorsees have been ask-

ing for. Necks that feel great and play like a dream. Hard wood bodies that give you the sustain you need. Tremolo systems that stay in tune and pickups that can scream or seduce.

The key features . . .

## Ultra<sup>®</sup> GP Series

Ultra GP Hard Body guitars feature two humbucking DiMarzio<sup>®</sup> Super 2 pickups. A bright, high output pickup, the Super 2 cuts through the thickest band like a razor. The hardwood body with a blended heel neck combine to give you a feel which is solid, yet smooth. Easy playing with maximum sustain. The "tummy-cut" makes it comfortable to play for hours and hours. The GP bridge is made

for Ovation by Schaller and provides the solid anchor you need for sustain. At the same time, it's completely adjustable for perfect intonation and variety of action. Secure those Kaman Performer strings in place with Schaller non-slip tuning machines and you've got a combination that is unbeatable. Available in Black, Honey Sunburst, Cherry Sunburst, or Wine Red.

- DiMarzio® pickups, standard equipment
- Schaller machines, standard equipment
- Kaman Performer strings, standard equipment

- Kahler™ Flyer™ Tremolo systems, available on the GS Series
- Kahler Bass Tremolo, available on the UB Series
- Schaller Bridges, standard equipment/GP Series

## Ultra® GS Series

Ultra GS Hard Body guitars offer the features and flexibility you've been looking for. The neck is maple and the four-bolt design locks it in place for great sustain. Deep cutaways let you glide all the way up to the 21st fret. The pickups: DiMarzio, of course. In one, two, or three pickup models with

either a standard fulcrum tremolo or the highly praised Kahler™ Flyer™ tremolo with string locks. Available in red, white, black, blue, natural, sunburst, and an all black model that'll have 'em rushing the stage.

## Ultra® UB Series Basses

The UB Series Hard Body Bass guitar is all the bass you will ever need. A great playing neck on a great sounding guitar. The DiMarzio® pickup gives you a massive bottom end and the clarity you want. Schaller machines keep the Kaman Performer Bass Strings in perfect tune. AND AN OPTIONAL

BRIDGE: The standard Schaller bridge with optimum mass and three dimensional adjustment capability, or the Kahler Bass tremolo, a truly revolutionary concept for the progressive bassist. Available in Natural, Red, Black, Blue, White, or Sunburst.

# Professionally Endorsed Components For Ultra® Hard Body Guitars

## Pickups

### DP-100/Super Distortion™ (GS1 Series)

The DP-100/Super Distortion is standard equipment on the GS1 Series: A high output pickup with a warm full tone. The DP-100's increased volume and sensitivity let the pickup "hear" notes longer, so they sustain better. With double the power of other pickups, it's terrific for every kind of rock.

### DP-103/PAF® (GS2 Series)

DP-103/PAF's are standard on the two pickup GS2 Series. These humbucking pickups have a medium output which gives you that warm, classic 1950's sound. Excellent for all kinds of music, the sound and power are balanced in a way that lets the PAF sound pretty and tough at the same time.

### DP-108/VS-1™ (GS3 Series)

### DP-101/Dual Sound™ (GS3 Series)

The three pickup GS3 Series is our most versatile Hard Body, equipped with two DP-108/VS-1 pickups and one DP-101/Dual Sound pickup. The VS-1's give you that classic 1950's single-coil sound, crisp without shrillness. In the bridge position, the DP-101 performs identically to the Super Distortion with the added benefit of single or double coil operation. You can brighten or lighten your sound with the flick of a switch.

### DP-104/Super 2™ (GP1 Series)

Forget what you've heard about humbuckers not having enough treble. The Super 2 is loud and bright: Really bright! If you have trouble being heard, this is the humbucker for you! It cuts like a razor. Stock equipment on the GP Series Hard Bodies.

### DP-122/Model P™ (UB1 Series)

We wanted a pickup for Bass that was both loud *and* clear. The Model P has more than enough power to make the UB Bass snap and growl with a great mid-range. This series/parallel switch lets you brighten your sound with the flick of a switch.

## Bridges

### Standard Tremolo (GS1-J, GS2-J, GS3-J)

Our standard fulcrum style tremolo system is a functional, high quality pitch modulator, available on one, two, or three pickup GS models. Sensitive and smooth in response, the standard tremolo has been set up at our factory to afford control in both upward and downward directions. Tension, intonation, and action are easily adjusted. It is a classic tremolo on a classically styled guitar.

### Kahler™ Flyer™ Tremolo (GS1-F, GS2-F, GS3-F)

The Kahler Flyer tremolo system represents a significant improvement over fulcrum style tremolos. A cam operated recoil device insures glitch-free, smooth rotation for a sensitive, free floating feel that always returns to pitch. A string locking system behind the nut insures secure intonation while precision fine tuning is accomplished at the bridge. Lower tension is easily modified with a simple adjustment. Incorporate all of the features of the Kahler Flyer tremolo into an American made quality system and you've got a bridge that can take you and your music as far as you want to go.

### Schaller Six String Bridge (GP1-S) Schaller Bass Bridge (UB1-S)

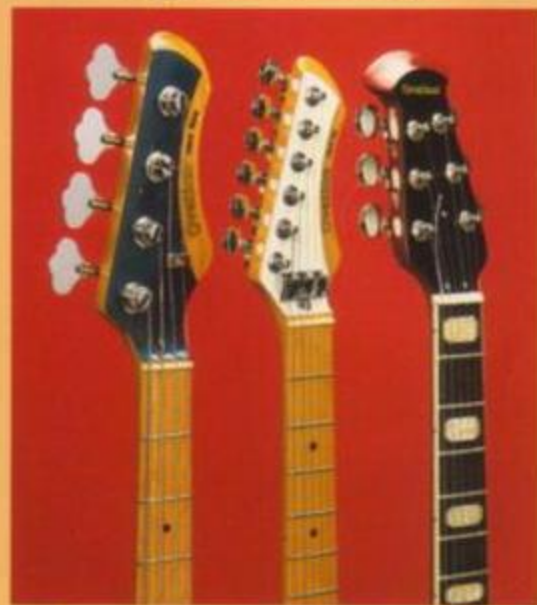

Schaller is a name that is synonymous with quality in these expertly designed and beautifully finished German-made bridges. Both the Schaller six string and bass bridges feature optimum mass for maximum harmonic resonance and sustain. At the same time, they are fully adjustable, allowing you to change intonation or height as you change your string gauges and playing style. The high luster chrome finish will look as great tomorrow as it does today. It's a truly professional bridge that you can be proud to own.

### Kahler Bass Tremolo (UB1-K)

The Kahler Bass Tremolo system has the same quality features as the six string variety, but with the radically inventive musical possibilities of applying this technology to the bass guitar. Endorsed by players like Benjamin Orr of the Cars and Tony Levin of King Crimson, the Kahler Bass Tremolo system will dramatically extend the range of your musical horizons.

## Schaller Tuning Machines

Tuning machines by Schaller have set the industry standard for over a decade. They truly are the finest available . . . anywhere. Geared just right for smooth operation, the Schaller machine lets you tune easily and *stay* that way. Above, left to right, the distinctive UB, GS, and GP pegheads.

## Ultra Fast Necks

The Ultra Series Hard Body necks have been designed with the most discriminating player in mind. They're necks that are easy to learn on and easy to live with. Hardwood maple necks that stay in place and sustain extraordinarily well. Adjustable for any style of playing or changes in conditions, they feature nickel frets that are finished with the musician in mind . . . flat and smooth, and headstocks that are showstopping. Uniquely Ovation.

## Kaman Performer Strings

Every Ultra® Series Hard Body leaves the factory with the finest strings available today: Kaman Performers for six string and bass guitars. These strings were developed at Kaman Corporation by the same people who designed the revolutionary Ovation and Adams guitars. They'll give your Ultra Hard Body the ultimate in output, clarity, and sustain.
