Adamas
by **Ovation**

Ovation's tradition of offering annual Limited Edition Collectors' guitars began in 1982. Since then, over 30 models have been part of this series. For the first time, Ovation's crown jewel - the Adamas - will be added to this list of collectable instruments as the 2008 Collectors' Edition.

In the early part of 2008, Ovation will commence production of 100 rare, and soon to be sought after, guitars. Each is virtually handmade in New Hartford, Connecticut, and features some of the best design and technology Ovation has offered in its 40-plus years as leaders in the acoustic/electric market. As with all Adamas models, the soundboard is made from highly refined carbon fiber (graphite) and attached to the body by a suspended composite ring. Its Contour body is handmade from lightweight fiberglass cloth and pumps out tons of acoustic energy. Powering the electric side is Ovation's own VIP preamp with five built-in microphone images that accurately replicate and enhance the guitar's natural voice.

Other specifications include a walnut neck, 1-3/4" nut width, slotted peghead, and 18k gold filled fingerboard inlays and top trim.
