The new Ultra guitar uses sub-assemblies made at our offshore Ovation factory. The sub-assemblies are shipped to New Hartford CT, where our skilled craftsmen carry out the final assembly and set-up operations. The result is a professional level instrument with the feel and playability of upscale USA made Ovation guitars.

Features such as the Deep Contour body, scalloped LX bracing, "soft V" neck profile, and the OP Pro preamp make the new 2071 one of the best values in the mid-priced acoustic/electric market.
