

Cutaway Roundbacks

Introducing an entire new line of guitars from Ovation: the Ovation Cutaway Roundbacks. The cutaway design allows free access to the upper frets for expressive chords and lead lines. All four models (three standard models and one shallow bowl) feature the unique "A"-shaped bracing pattern developed by Ovation, as well as our special neck configuration encompassing the exclusive Kaman Bar™. A "U"-shaped aluminum casting bonded into the necks, the Kaman Bar™ incorporates a 1/4" steel tension rod allowing precise neck adjustments. Combined with our famous built-in acoustic electric pickup system, these new Ovation Cutaway Roundback guitars take your music to new and dynamic places.
